# Advanced Road Safety Audit

## Course Overview

A two-day course designed to provide a more advanced level of knowledge and experience on the audit areas covered and more challenging workshops. The advanced course is aimed at practicing safety auditors who want to build on their safety audit experience. The course consists of informal short lectures, practical workshop and discussion sessions, case studies and examples.

## Aims and Objectives

The two-day course gives delegates a more comprehensive understanding of road safety auditing at an advanced level.  It provides delegates with the knowledge, skills and understanding to carry out their professional roles

The advanced course provides the opportunity for delegates to network and discuss more complex issues in auditing and to give advice to delegates on their own road safety audits to improve their audit skills.

## Topics Covered

The two-day course focuses on the following key areas:

- Road Safety Audit Procedures and issues of concern
- Technical skills and competency workshop
- Consistency of audit problem identification workshop
- Development Schemes - audit issues
- Development scheme audit workshop
- Legal Issues
- Auditing major schemes
- Design standards and safety audit
- Auditing unusual / specialist features
- Auditing complex junctions
